Keywords are important for online searching. The Importance of Keywords.

Metadata (title/author details/abstract/keywords) is a vital part of any paper, since, in our online world, it is the metadata which is freely available to all users and is sent to many and varied online sources, from which users undertaking online searches will trace the paper. If you want your paper retrieved by the maximum number of people, the metadata is vital. The **Keywords** field is essential in that this is the most frequently searched field if search results.

To ensure the publication schedule is maintained and in the event of you not replying within this timescale, contact will be made with the Editor of the issue and it is possible that the paper will be held back from publication.
